INFORMATION DISCLOSURE STATEMENT

2 German patent no. 467,081 (1969) discloses radio
3 receiver on a downhill ski binding. A radio transmitter
4 activates a solenoid to release a spring braised cam which
5 in turn releases a lever connected to a heel piece of a
6 downhill ski binding. The lever releases the heel piece.
7 No suggestion of a sliding heel piece is shown.

8

9 Osterreichisches patent no. 304,329 (1972) discloses a
10 solenoid activated heel piece release mechanism. No
11 suggestion exists of a sliding heel piece.
